(54) Title: PROCESS AND DEVICE FOR COATING A FINELY MILLED SOLID

(57) **Abstract:** The present invention relates to a process for the application of a liquid to a finely milled solid, which process is characterized in that the liquid to be applied to the finely milled solid is introduced into the milling zone of a fine milling apparatus during the milling operation or simultaneously with the introduction of the material for milling, and the fine milling is carried out in the presence of the finely divided liquid, and to a device for carrying out this process.
